

Nee-Vo

INTRODUCING OUR NEW SMARTPHONE APPLICATION

Nee-Vo helps you accurately monitor your propane tank level!

Has your fireplace ever run out of propane during the coldest month? Or has your pool-heater or barbecue stopped working during a big event up at the cottage?

Welcome to the era of real-time telemetry and the internet of things (IoT) with Otodata.

With Nee-Vo, trying to accurately guess propane tank levels is now a thing of the past. Get accurate, real-time readings of all your propane tanks instantly on your smartphone.

KEY CHARACTERISTICS OF THE NEE-VO APP

- ✓ Accurately track the level of your tank in real-time from anywhere
- ✓ Consult your usage for the past 3 months in the blink of an eye
- ✓ Receive instant notifications on your smartphone when your tank reaches configurable and pre-determined levels
- ✓ With just one tap, contact your propane supplier to request service or a refill
- ✓ Monitor and manage multiple tanks from one account
- ✓ Share access to data with up to 5 users

Personalised App icon for propane retailers.*

INTERESTED?

Contact your propane supplier today and ask for your Nee-Vo activation code!

Important: Downloadable from App Store. Nee-Vo requires the installation of the Otodata telemetry unit **PM8040** to function. Your tank(s) must also be located within the coverage area of the Otodata Network.

Consult the Otodata Network coverage map here: otodata.ca/network
